

6060-267 Supreme 5 Tier Shelving ©2011 Whitmor, Inc.

Assembly Time:
Less than 30 minutes.

This product's intended use is for dry storage and heated environments in a home or commercial setting. The shelf capacity is 350 lbs. when weight is evenly distributed.

Tools Needed:
No tools required.

STEP 1. Connect upper pole (D) to lower pole (E) by threading connector (F) into open end of the poles (there is a small ridge in the middle of part (F) to gauge the distance). Screw foot (B) into assembled pole at small threaded end. Repeat step 1 for remaining poles.

STEP 2. Starting at the bottom (the end with the small threaded hole and foot), snap two sleeves (A) onto poles at desired intervals. The sleeves are marked with a directional arrow to show proper placement. Use grooves on poles to ensure even shelf placement among the four poles. NOTE: Place only enough sleeves to assemble bottom shelf. This step will be repeated for each additional shelf.

STEP 3. Slide poles with plastic cap on top through shelf corners until shelf rests firmly on sleeves. Push or gently tap the shelf down at corners to level shelf. Repeat steps 2 and 3 for each additional shelf. Turn feet (B) to level unit.
