Cover

**Assembly Time:**  
Less than 1 hour.

This product's intended use is for storing clothes.

**Tools Needed:** No tools required.

**Note:** All metal parts must be inserted firmly and completely into the plastic parts.

**STEP 1.** To assemble the lower frame, insert two frame tubes (B) into one corner support (A1). Insert two male frame tubes (C) into center support (A2) where frame tubes intersect. Place another corner support (A1) onto the end.

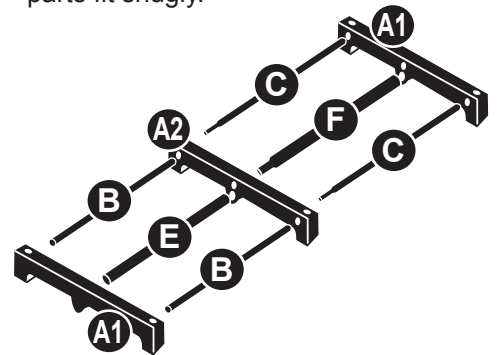

**Note:** For easier assembly, unzip cover before installing.

**STEP 2.** Insert six vertical frame tubes (D) into lower frame. Do not assemble the vertical frame tube sections together yet. Unzip zipper on cover (G) and carefully fit holes in bottom of cover over the vertical frame tubes. Slide cover down and carefully lay the cover back.

**Note:** Closet rods (E & F) are wider in diameter than frame tubes (B & C) and are inserted into the larger lower center holes on (A1 & A2).

**Note:** Make sure (E) is placed through the stickered side of (A2) first, then slide in (F) from opposite side. This will help make sure the parts fit snugly.

**STEP 3.** To assemble top of frame, insert two frame tubes (B) and the clothes rod (E) into one corner support (A1). Insert center support (A2) onto the tubes. Insert two male frame tubes (C) and the male clothes rod (F) into center support where frame tubes intersect. Place another corner support (A1) onto the end.

**STEP 4.** Complete assembly by unfolding the vertical frame tubes (D) and placing the two sections together. Place assembled upper section (assembled in step 3) onto end of frame tubes.

**STEP 5.** Lift cover up over the top of the frame, carefully fitting the corners of the cover over the top corners of the frame. Slide the bottom of the cover downwards evenly to the base of the frame.

**Note:** Although your clothes closet can be assembled by one person, it is recommended that two people install the cover.

Part	Reference
